CARLYLE

CREEPERS FOR COMFORT

The **Carlyle Engine Bay Creeper** is built tough for the grind, featuring a knee pad that gives solid support when you need it most and a quick action latch for blazing-fast adjustments. Its pivoting frame and 1-inch wide lockable casters deliver smooth, controlled mobility that moves with you, not against you. The sliding bed, crafted from breathable perforated fabric, keeps comfort front and center, while the rapid, tool-free bed height adjustment lets you find the perfect position without ever needing to hop off. When folded, it tucks away clean and easy, making storage a breeze. Designed to handle the rough and rugged demands of the shop, this creeper stands up to heavy static and dynamic loads, positioning you just right to own the job.

PART NUMBER: CQU CHDC

The **Carlyle Under Dash Creeper** is engineered for maximum comfort and flexibility with a quick-action latch and rapid, tool-free bed height adjustment that lets you customize your setup on the fly. Its pivoting leg adds stability whether you're working low or switching positions, while the removable kneeling pad cushions your knees for long sessions. The heavy-duty plywood insert delivers strength where it counts, and a rubberized corner protects the bed during storage. The fold-away design tucks the creeper away easily, saving space in any garage. The High Lift version steps up with a quick-action pneumatic lift and a higher bed height specially designed to position mechanics perfectly for SUVs and

PART NUMBER: CQU CHLIUDC

The **Carlyle Heavy Duty Creeper** is built tough to handle the brutal demands of any garage, featuring a welded cross-ribbed tubular steel frame that stands strong under static and dynamic loads. Its extra-wide plush cushion bed in breathable perforated fabric delivers ergonomic support and lasting comfort, while the contoured, elevated headrest cradles the neck. Industrial-grade 1-inch wide pin
